

RAPID DEPLOY

WIRELESS SOLUTIONS

FEATURES

- Completely Self Contained
- Solar Powered; No Trenching!
- Robust Wireless Back Haul
- Dual 802.11ac Wi-Fi AP's
- Built In Sector Antennas
- No RF Cables to Fail!
- Self-Interference Mitigation
- No Site Modification
- Collapsible Tower, No Bucket Truck!
- Easily Repositioned with Fork Lift
- Supports IP Video Backhaul
- Complete Remote Management
- 24/7/365 Managed Services
- Extremely Cost Effective

THE SOLUTION IS HERE.

Buckeye Mountain is pleased to announce the development of our unique "Rapid Deployment" wireless solution. Motivated to solve the many challenges faced by our customers in the Rail and Transportation sectors, we went to work and designed the perfect solution. Some of the top issues we addressed are the cost of trenching power and network connectivity, the lack of available vertical assets, self-Interference in outdoor deployments and high speed bandwidth demands. With our extensive in-house expertise in Wireless and Network Engineering, we have developed a cost effective and technically superior platform that can be deployed quickly and be operational in days, not months. Paired with our Managed Services, our customers will have the peace of mind that in the event a failure occurs, our staff of technicians will be diagnosing the issue within minutes. A full range of services can include 24/7/365 monitoring, technical support and personnel dispatch for hardware replacement. Secure, Hi-Speed, High-Performance, Resilient, Reliable, Rapid and Cost Effective. Finally, *THE SOLUTION IS HERE.*

Please contact a Buckeye Mountain representative for an in-depth webinar presented by our Director of Wireless Engineering
